

MOUNT

 Loosen to adjust/release

 Turn right to secure

*The sticky gel suction cup is re-usable. Rinse it in warm water and let it air dry.

Mount Installation

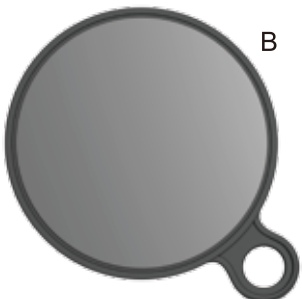

1. Clean the surface you want to install the mount on with included alcohol prep pad and allow to air dry.
2. You may install the mount forward or backward depending on the length that you need.
3. Place the mount base in position and push it against the surface.
4. Continue to apply pressure on the mount base and push down the secure lever.

3M adhesive side
- textured/rough surface -

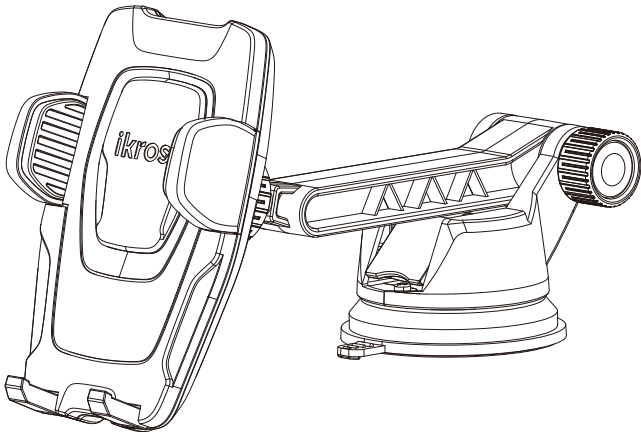

Glossy side
- mount base -

NOTE : If the mount cannot be installed firmly on your car dashboard, please try the mount disk.

1. Peel off the release liner on side A and stick it onto the dashboard. (wait for 1-hr)
2. Peel off the transparent film on side B, follow above mount installation steps to install mount base onto the mount disk.
