

## AIR VENT MOUNT

## MAGNETIC HOLDER & METAL PLATE

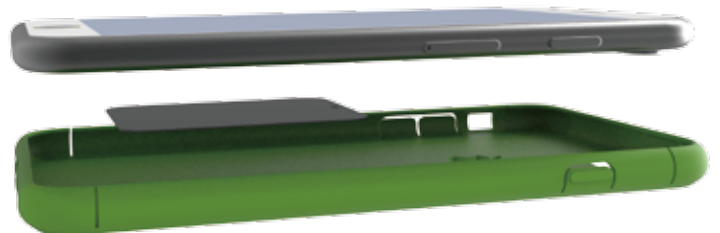

### Metal Plate Installation

- A - Stick on the phone or its protection case
1. Peel off the protection film and stick it onto your phone.
  2. Peel off the release liner of 3M adhesive tape on metal plate and stick the metal plate onto the protection film.

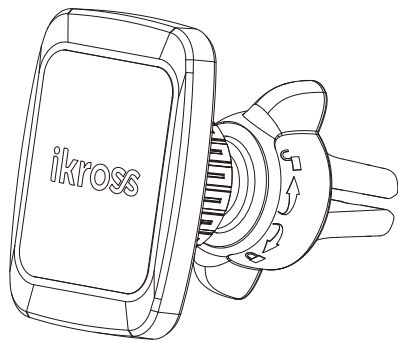

\* If the protection film can not be stuck onto you protection case firmly, please use the metal plate directly.

- B - Between phone & its slim protection case
1. Peel off the release liner of 3M adhesive tape on metal plate and stick the metal plate onto inside of the protection case.
  2. You can also try not peel off the release liner, just put the metal plate between phone & its protection case.

\* DO NOT place the metal plate between your phone & protection case, if you use a thick protection case.

Car Air Vent Mount  
Magnetic Holder for Smartphone

**USER'S MANUAL** IKHD81

NOTE : Recommend to install the mount on the bottom  
of the air vent.

### **Mount Installation**

- Unscrew the knob to release the clamp.
- Screw back to hold securely on air vent.

\* To avoid the air vent from snapping, it is recommended to adjust the angle of the ball joint before installing onto the air vent.

### **Attach your phone onto the magnetic phone holder**

Hover your phone near the magnetic phone holder to instantly lock your device securely in place.
